1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-13, drawn to a grip-enhancing material, classified in Class 2, subclass 161.1.

II. Claims 14-49, drawn to a grip-enhancing material, classified in Class 428, subclass 354.

2. The inventions are distinct, each from the other because of the following reasons:

3. Inventions Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together, or they have different modes of operation, or they have different functions, or they have different effects. (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have a base material for the claims of Group I which features a specific pattern of recesses of a certain depth, and is not related to the plurality of suction cups of a certain density and diameter which is the apparent point of novelty of the invention set forth in Group II.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Lee Osman on June 9, 2005

Art Unit 1771
